

Patients and Friends of Fedorko Chiropractic Health Center,

After 5 years of serving patients in Canton, my wife and I have decided to start our own practice in Bozeman, Montana. It has been my pleasure to serve each and every one of you and I will miss you all! Over the next eight weeks [through the end of March] I will be turning over the responsibility of your care to Dr. Nicole Wilson and Dr. David Young. They are very knowledgeable and will provide excellent care.

Dr. Wilson has been a patient of mine for 5 years and now has received her degree as a Chiropractic Physician in 2009 from the New York Chiropractic College, my alma mater. She has extensive training in applied kinesiology, she understands what it is to be a patient here and you will find her excited to continue with you in your care.

Dr. Young is a 2005 graduate of the Logan College of Chiropractic and has been with us here in the office for over a year. You will find him a wealth of knowledge and a great health team member as you learn to take the best care of yourself.

One last request: as you are aware, Applied Kinesiology is a unique form of Chiropractic and the people in Bozeman have no experience with applied kinesiology. I would like to share some of the types of conditions we have worked on and our successes. If you are so inclined, I would appreciate a testimonial on your treatment experience and how your life has been affected by our care. [Testimonials must be delivered to the office during office hours, at which time you can sign our release form allowing your testimonial to be presented to the general public.]

I trust that you will give Dr. Wilson a warm welcome and trust in Dr. Young and Dr. Wilson as you have trusted me.

I appreciate your continued trust in Fedorko Chiropractic Health Center as your family's Chiropractic Physicians.

Philip Cameron, D.C.
